URL SENSOR INTERGATION GUIDE

Spottune Sensors – Cloud API Calling Integration

Spottune Sensors is a feature within the Spottune Cloud system that enables external systems to trigger predefined audio actions via API calls. This allows Spottune to be seamlessly integrated into broader IT infrastructures and automated workflows.

Through the Spottune Sensors API calling, third-party platforms such as POS systems, building management tools, queue management, or digital signage solutions can initiate actions in the audio environment—such as starting playlists, adjusting volume levels, or switching content zones—based on real-time events or triggers.

The system is designed to support scalable and event-driven audio automation, ensuring a fully synchronized and dynamic customer experience across digital and physical environments.

4. GO TO ROUTINES

The screenshot shows a web application interface for managing sensors. On the left is a vertical sidebar with icons for various functions: a lightning bolt, a grid, a calendar, a musical note, a signal tower, a megaphone, two people, a person with a signal, a calendar, a bell, and a key. The main header area is light blue and contains a 'Sensors' title with an information icon and a user profile icon. Below the header is a white content area with a search bar, a '+ ADD SENSOR' button, and a table. The table has columns for 'Name' and 'Actions'. The 'Name' column contains a single entry 'Sensor Action'. The 'Actions' column contains a 'SHOW API URI' link, an edit icon, and a delete icon. At the bottom of the table area, there is a pagination section with 'Items per page: 10', '1-1 of 1', and navigation arrows. A large black arrow points from the text 'GO TO ROUTINES' to the 'Sensors' icon in the sidebar.

7. ADD ACTION

The screenshot displays a user interface for managing routines. On the left is a vertical sidebar with icons for various features: a lightning bolt, a list, a calendar, a music note, a target, a megaphone, two people, a person with a signal, a calendar, a bell, and a key. The main header area shows 'Routines' with a calendar icon and an information icon, and a user profile icon in the top right. A blue button labeled '+ NEW ROUTINE GROUP' is in the top right. The main content area features a 'Sensor Routine' card. Inside this card, there is a blue button '+ NEW ROUTINE' and a link 'EXCEPTION DAYS'. Below these is a 'Sensor Action' item, which includes a person icon with a signal, the text 'Sensor Action', and a dropdown arrow. A large black arrow points to this 'Sensor Action' item, with the word 'EXPAND' written below it.
